# Client's Requirement

The client has a special requirement to live stream their meetings on multiple platforms, including a their website, and their social media platforms such as Facebook, YouTube, and Twitch.

# Our Solution

The client has a special requirement to live stream their meetings on their website and their social media platforms, including Facebook, YouTube, and Twitch.

Unlike other brands that conducted proof-of-concepts on paper, we stood out by providing an on-site demonstration of our solution.

The client was extremely satisfied with the demo and decided to keep our demo unit, which was subsequently installed for their live streaming needs.

By meeting the client's requirements, we have demonstrated our commitment to delivering tangible results and providing a reliable and effective solution.

The client's decision to choose our demo unit further validates the quality and value of our offering.

With our solution in place, the client will be able to seamlessly broadcast their meetings on their website and engage a wider audience through popular social media platforms.

We are confident that our live streaming solution will exceed their expectations and enable them to achieve their communication goals effectively.
